YpsoMate®

Clear to Clinic™

For YpsoMate and YpsoMate 2.25

swissengineering

Streamline clinical development with Ypsomed

Clinic-ready devices to accelerate trial readiness and reduce study risk
Clear to Clinic enables the use of autoinjectors in clinical trials with clinic-ready devices and a coordinated supply path.

- **Accelerate clinical supply**
  Quick access to assembled clinic-ready devices with various dose configurations and placebo
- **Gain flexibility in study design**
  Design and adapt your study protocol with flexibility and confidence
- **Enable decentralized trials**
  Use proven self-injection devices backed by submission-oriented documentation

Making selfcare simpler and easier.

YPSOMED
SELFCARE SOLUTIONS

Accelerating clinical readiness with platform performance data

Submission-ready documentation 3 months after clinical fill
- Standardized device-related information for efficient trial submission
- Assembled clinic-ready devices delivered within 4 months of clinical fill

Multiple fill volumes/viscosities and drug product/placebo combinations
- Deploy autoinjectors flexibly in clinical studies
- Adapt to changing study protocols

Comparable injection profile and user interface across clinical and commercial devices
- Clinical performance data and documentation can be integrated for customized commercial devices

A coordinated supply path to clinical integration

Reducing complexity through platform-based execution

Device and platform
- Clinic-ready devices from a verified platform
- Standardized documentation as a stable baseline

Clinical supply and execution
- Coordinated clinical supply via partner CMOs
- Predictable timelines for clinical supply readiness

Expert support and governance
- Submission-oriented documentation and comparability support
- Active coordination across partners
